Description

This course delves into the full story of the extraordinary Medici family, whose fortunes are traced over three hundred years (late-14th century to early-18th century)--from the rise of the bank under Cosimo the Elder, to the final collapse of the house of the Medici with the death of the Grand Duke of Tuscany in 1737. Since the power of the Medici family enabled family members to rule Florence, control the Papacy, "act as the needle of the Italian compass" and, sometimes, influence the policies of an entire continent, a study of this family provides students a thorough understanding of the history, politics and civic life of this period. The Medici were statesmen, scholars and patrons of art; collectors; entrepreneurs and impresarios. Some of them were poets; others were popes. This class attempts to explain a pattern of political control that led Florence from a republicanism uniquely energetic in its cult of liberty to the drowsy acceptance of near-absolutist rule.

The class also introduces students to relevant philosophies and artistic movements by discussing the most important achievements of artists and architects who worked for the Medici, such as Brunelleschi, Donatello, Michelozzo, Michelangelo, Botticelli, San Gallo, Bronzino, Vasari, Buontalenti, Cellini and different musicians who worked in the Medici court during the 16th and 17th centuries.

Slides and site visits supplement in-class lectures.
