CET COVID-19 Vaccine Policy

Starting with Summer term 2023, CET will highly encourage, but not require, participants in its programs to be vaccinated against COVID-19.

However, CET will continue to follow all local requirements, including those of host countries, host institutions, and airlines, where they exist. In locations where local requirements remain, CET will not be able to support any exemption requests.

Potential applicants who have concerns related to which locations will still require vaccines should contact CET for further information.
